

**Decisions of the 105<sup>th</sup> Management Team 2009 (21 September 2009) – ESE 24280**

- 39.2009.01  
(Education) With regard to the test for the new study programme for an MSc in Accounting, Auditing and Control, the required efficiency test has been set up and approved so that it can be passed on to the 'Macrodoelmatigheid' Committee of the Ministry of Education, Culture & Science via the Executive Board
- 39.2009.02  
(Education)) Based on the overview of the distribution of students over the minor programmes given at the Woudestein Campus, and the negative balance that results from this for the ESE, the following was decided:
- 1) Not to offer any additional minor programmes, but rather to optimise the current selection.
  - 2) To assess the interest among students for taking a minor at the TE department in Behavioural Economics and at the BE department in Finance.
  - 3) The ESE will urge the Executive Board to take one of the two measures in order to keep the pricing constant: *Either* a ceiling is set on the number of students that are allowed to take a minor *or* the price per student will be realistic if many students register for a minor.
- 39.2009.03  
(Research) With regard to the re-accreditation procedure of the research schools and the midterm review of the research programmes, it was decided to appoint an employee for 0.5 FTE during a period of six months for providing extra support. The ESE will bear the costs for this.
